

# Public funding advisory

**Greenstep's business model is developed based on growth and finance processes of international level. This approach enables world class quality and scalability for finance, but at the same time remains agile and suitable for companies of all sizes.**

We boost our customers' growing businesses by providing guidance and expertise in finding and choosing the most suitable public funding source and taking care of the application process.

When applying for public funding, the process can be time consuming and complicated. Our experts ensure that the application process and funding related reporting run smoothly. Public funding is available for business development, strategic planning, leadership and product development. Our consultants have been working with public funding for years and have the knowledge on finding the best suitable funding for your company.

With a little help from our financial management experts and with a high quality application it is more likely to receive public funding. In addition to the application process, our expert can also represent your company in other finance related matters throughout the projects e.g. progress and change reporting are taken care of cost-efficiently. At the end of the project Greenstep's expert can also take the role of a contact person with the auditor in the final report auditing.

When choosing the best alternative for public funding we always familiarise ourselves with your business and the service is tailored to customer needs. We'll take care of the funding process and customer may focus on developing the business.

The service can include e.g.:

- Familiarisation with the business and financial structure
- Search of the best public funding source and making of funding plan
- Writing the application with customer company's top management
- Reporting of changes, progress and final reports
- Guidance in project's accounting
- Our expert taking the role of a contact person in auditing
